Introduction

A Responsive College Event Website is a web page designed using HTML and CSS to display information about college events in a clear and attractive way. It provides details such as the event name, date, time, venue, schedule, speakers, and registration information.

The website is made responsive, which means its layout automatically adjusts to different screen sizes such as computers, tablets, and mobile phones. HTML is used to create the structure of the webpage, while CSS is used for styling, layout, colours, fonts, and responsiveness.

The main purpose of this project is to create a user-friendly and visually appealing platform where students can easily view and learn about upcoming college events.

INPUT CODE

```
<html>
  <head>
    <title>College Event</title>
    <style>
        body{font-family: 'Franklin Gothic', 'Arial Narrow', Arial, sans-serif;
        text-align: center;
    }
        color: rgb(0, 0, 0);
        body::before{
            content: "";
            position: fixed;
            top: 0;
            left: 0;
            width: 100%;
            height: 100%;
            background-image: url("./movietheater.jpg");
            background-size: cover;
            background-position: center;
            opacity: 0.7;
            z-index: -1;
        }

        h1{
            font-size:70px;
        }
        h2{
            font-size:40px;
        }
        nav{
```

```
            background-color: rgb(21, 205, 222);
            padding:40px;

Conclusion

In conclusion, the Responsive College Event Website provides a simple and attractive platform to display college event information. Using HTML, the structure and content of the website are created, while CSS is used to design and make the webpage responsive. The website can be accessed easily on desktops, tablets, and mobile devices. This project demonstrates the basic concepts of web development, including webpage structure, styling, layout, and responsive design.
